The Christiansen et al. reference is cited to complete the record.

Claims 40-44, 47, 48, 50-54 and 60-64 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected ~~invention~~<sup>\*†\*</sup>, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

Applicants elected the enhanced combination of 1, 25-dehydroxyvitamin D3 and norethindrone with traversed in paper no. 6. The other enhanced combination would support other patents. Therefore, the restriction requirement is herein made final.

Applicant is advised that should claim 49 be found allowable, claim 35 or 59 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

Applicant is advised that should claim 55 be found allowable, claim 45 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

Applicant is advised that should claim 56 be found allowable, claim 46 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 35-39, 41, 42, 45, 46 and 55-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over need et al. reference.

The need et al. reference has an effective date of 1986 while the instant application has an effective date of September 13, 1996.

Art Unit: 1614

The need et al. reference teaches the combination of "calcium and ovarian hormones, with or without calcitriol caused a small non-significant use in forearm mineral density" (see AB, lines 6 and 7). The only ovarian hormone disclosed is norethisterone (see Rr, line 3). The norethisterone is the same as applicants' norethindrone and the calicitriol is 1, 25- dehydroxyvitamin D 3.

The instant claims are directed to composition claims only. Accordingly, one skilled in this art would be motivated from the prior art supra to form the claimed composition since the only ovarian hormone disclosed is norethisterone and the claims are directed to "comprising", With regard to the amount being employed, the amount are within the skilled of the art in the absence of a showing of an unexpected result.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner J. D. Goldberg whose telephone number is (703) 308-4606. The examiner can normally be reached on Monday-Thursday 9:00 A.M - 3:00 P.M.
